SCHOOL OF MEDICINE

DEPARTMENT OF GENETICS  
*Professor J. Lederberg, Executive*

See the enclosed references. All I have on horses  
is Comfort's note -- he finds no effect of paternal  
age (in a small sample).

Cavalli is also working on the effect of grandparental  
age on the sex ratio to measure the spontaneous rate of  
mutation for X-borne recessive lethals.

An index to abstracts on sex ratio appears in the  
12/60 Am J Human Genetics.
